

NEW

Transparent nCPAP mask

Supporting the smallest patients

From Q1 2026, the medin nCPAP Masks Size L will be available in a new high-gloss transparent finish, after the successful release of the transparent Mask Size M last year.

The transparent design provides a clearer view of the contact area – making it easier to assess:

- Positioning
- Air leakage
- Potential skin irritation

This improvement also makes our nasal masks particularly suitable for use in the delivery room, where recent studies have shown nasal masks to outperform traditional full-face resuscitation masks.*

The proven shape and material of Sizes M and L remain unchanged, as do the article numbers.

If you have any questions regarding the Nasal Masks M & L, please contact our sales team.
